"A Pound of Pianos Please"

Let's face it. A piano is not bought in the same manner as apples. A piano is special — an instrument purchased with the future in mind and purchased where the customer is assured of friendly and expert advice. This is the main reason why McCullough's are so famous (and so popular) for their pianos. McCullough's interest in YOUR piano doesn't end when THEY sell it. No. Instead, they provide an after-sales service and dependability not easy to come by these days. Skilled tuners to maintain your piano in good shape, reconditioners to give old pianos a new lease (and look) of life. Plus a 10 year guarantee as well. And the price ? As little as 90 guineas.
